DO NOT LOSE HOPE

Rheumatism Is Cured Every Day by a Treatment That Really Cleanses the Blood of the Rheumatic Poisons.

Why are there so many failures in the treatment of rheumatism?

Why are so many sufferers resigned to a life of pain, despairing of a permanent cure?

Because rheumatism defies any treatment that does not build up and purify the blood. The poisons of rheumatism are in the blood and it is only through the blood that the disease can be fought successfully.

Unless the blood is weak and impure, rheumatism cannot get a foothold. When it does the thin and impure blood is not strong enough to overcome the poisons alone. It must be strengthened and purified. Dr. Williams' Pink Pills for Pale People are the best blood-building medicine you can take.

Mrs. Walter Anderson, of R. F. D., Valeda, Kansas, says: "When I was about thirteen years of age I had a severe attack of inflammatory rheumatism in my limbs, which were terribly swollen. I suffered intense pain and from that time until I took Dr. Williams' Pink Pills I suffered a general weakness. There was a constant pain through my head and I never saw a well day. I was weak, generally run down and had no ambition to work. My blood was thin and I lost in weight. I was tired and languid all of the time. I had no appetite and my stomach was out of order. Whenever I was chilled I was troubled with rheumatic pains in my limbs. I was very nervous and was often confined to bed for a week."

"The doctors did not do me a particle of good and they did not seem to know what ailed me. After being under their care for some time, my father decided to have me try Dr. Williams' Pink Pills. I could see that they were helping me after taking a few boxes as my strength came back and my headaches disappeared. I have been in very good health since."

A booklet, "Building Up the Blood," containing helpful information about rheumatism, after-effects of the grip and fevers, anemia and chlorosis, will be sent free upon request.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box; six boxes, \$2.50, by the Dr. Williams' Medicine Co., Schenectady, N. Y.

TELLS OF PLANS TO COMPLETE EXPOSITION BUILDINGS ON TIME

President Moore Describes the Work in Progress and To Be Executed

SAN FRANCISCO, Cal., Sept. 12.—

"The Exposition That Will Be Ready" is the slogan that we wish to put before the public at this time, so that the good news may be heralded throughout the world," declares Chas. C. Moore, president of the Panama-Pacific International Exposition. "Within ten months each one of the great exhibit palaces of the main group of exposition buildings will be under construction. All of them will be completed on or before June 25, 1914."

"The first great palace to be commenced will be that devoted to machinery. The contract for this will be let on or before November 11. From then on contracts for the other great exhibit palaces will be let at the rate of two a month, and all of these great structures will be in course of construction inside of nine months. It is estimated that ten months is the maximum limit of time necessary to complete the most elaborate of the palaces."

"While other expositions have employed a great number of men shortly before their opening and have consequently lost a great deal in time and efficiency, we will distribute our labor so that the maximum employment will come a long time before the exposition opens. A large number of men will be given employment within ninety days, and this number will be gradually increased until the fall of 1913, when the work of construction will be at its height on all buildings, and as rapidly as these are completed the number of men will become less from month to month."

"The early start upon the exposition will give it an incalculable advantage and greatly contribute to its prestige and success. It will serve to stimulate the entire work which is now in all important phases relatively much further advanced than at other great world's expositions."

"It is anticipated that the construction work to be undertaken by the different States and nations will keep pace with the progress made upon the exposition palaces."

"The finishing of the buildings at so early a date will give ample time for the setting and growth of the trees, shrubs and vines which will be transplanted upon the exposition grounds."

Some interesting points about the Panama-Pacific International Exposition:

The Court of Honor will be entirely surrounded by a colonnade comprised of massive arches. Groups of statuary symbolizing the rising and the setting sun will surmount the colonnade.

The dominating theme of the exposition from an architectural viewpoint will be the huge tower of the Administration Building, 425 feet high and flanked on either side by the gilded domes, towers and minarets of the remaining buildings of the group.

The largest building group in the exposition will be the Palaces of Agriculture, covering in two sections a floor area of 680,000 square feet.

Hundreds of thousands of trees, shrubs and vines are ready to be removed at the proper time and set out in accord with the plan that will harmonize with the architectural and color scheme of the buildings.

One of the most striking of the exposition palaces will be the Horticultural Building, whose domes and minarets will rise up 100 to 125 feet. The building will be constructed of glass. The concessions and amusement center will occupy 65 acres, the Manufacturers Building an area of 276,250 square feet. The total area of the main exhibit palaces in square ground feet will be 3,731,500.

Harris D. H. Connick, director of works of the Panama-Pacific International Exposition, states:

"Up to the present time, the activities of the buildings and grounds committee have been, in addition to the architectural plans, largely confined to acquiring the necessary lands and preparing plans and specifications for the engineering work, the construction of sewers, the construction of water supply system and of fire protection system and the construction of underground conduits for carrying the electric light and power lines. The amount of money expended on that work will be somewhere in the neighborhood of \$3,000,000. Practically all of the lands are secured now. There are a few suits

pending, but they will probably be closed up within the course of the next few months.

"The underground work will start immediately. The plans and specifications for the sewers to be built in the amusement section are practically complete and within the next thirty days bids will be called for this work."

"The same is true of the electric lighting system in the amusement section and the water supply system for the entire grounds."

"The fresh water supply system is laid out and bids will be called for the materials of pipe, valves and fittings inside of thirty days, and as soon as that material arrives the work of putting it in the ground will be taken up. The sewer work is to be cut up into several small contracts in order to expedite its construction and start them all at once, or all within a week or so of one another."

"There has to be a system for the distribution of compressed air to be installed, and there will be a number of exhibits in the various buildings that will require compressed air for operation."

"It will also be necessary to install a system for the distribution of steam. In the Machinery Building, Transportation, Mines and Metallurgy Building, it will require steam for the operation of exhibits and also for heating purposes."

"We have been at work for some time on the planting end of the exposition. At the present time John McLaren has over forty thousand trees and plants for the exposition. These have been purchased from various nurseries up and down the Coast and a number he has started himself. These are to be immediately moved into the exposition and into the nursery, which is to be located in the Presidio. We are going to mark off the areas devoted to parks, and immediately Mr. McLaren is to take up the question of planting in these parks."

FRIENDLINESS OF JAPAN

"The death of the Emperor of Japan," says the Philadelphia Record, "has caused much speculation among the jingoes as to the course that will be pursued by his son, who succeeds him on the throne, in the future relations between this country and the island empire. At Longue Island recently a group of naval officers, some of whom had seen service in Japan, were discussing the emperor's death, when a visitor referred to the possible effects it might have upon the peace of the world. 'I do not think that the death of the emperor will make any material difference in the policy of Japan toward this country,' said one of the officers. 'I believe the young man who assumes the reins of government will continue in his father's footsteps, exerting every influence for peace, and that his reign will prove satisfactory to the other powers in every respect. It is a mistaken idea which most people have in this country that the Japanese are antagonistic to America, and all things American. In all the time I was in Japan I failed to find any real evidence of such feeling, but, on the contrary, was astonished at the attention accorded me everywhere just because I was an American. The fact of the matter is, most Japanese believe that the people of this country bear animosity toward Japan and cannot understand why they are so grossly misunderstood.'"

TERRITORY SCORES IN TAX APPEAL CASE

In the matter of the tax appeal of Wailuku Sugar Co., the Supreme Court yesterday set aside its former order, made on motion of M. F. Prosser, for introduction of new evidence. This was done after hearing an affidavit by A. A. Wilder, for the tax assessor, showing that there was ground for the introduction of new evidence.

Argument will take place on the evidence as it stands. Briefs are not yet filed. The company returned its property for taxes for 1912 at a valuation of \$3,250,000. The assessor increased the valuation to \$4,250,000, and the company accepted \$250,000 of the increase, appealing from any valuation in excess of \$2,500,000.

GROWS BEAUTIFUL, HEAVY HAIR WE PROVE IT—25 CENT "DANDERINE"

Destroys Dandruff—Stops Falling Hair—Cleans and Invigorates Your Scalp—Delightful Dressing

To be possessed of a head of heavy, beautiful hair; soft, lustrous, fluffy, wavy and free from dandruff is merely a matter of using a little Danderine.

It is easy and inexpensive to have nice, soft hair and lots of it. Just get a 25-cent bottle of Knott's Danderine now—all drug stores recommend it—apply a little as directed and within ten minutes there will be an appearance of abundance; freshness, fluffiness and an incomparable gloss and lustre and try as you will you cannot find a trace of dandruff or falling hair; but your real surprise will be after about two weeks' use
